ABOUT ME

I am a Software Engineering undergraduate at Telkom University with experience in backend web development, software construction, and database system. Skilled in problem solving, teamwork, and collaborative project development. Passionate about software engineering, countinuous learning, and contributing to structured and fast-paced environments.

EXPERIENCE

Lecturer Assistant, Database Course **2026**

- Assisted lecturers in teaching database systems, SQL queries, normalization, and relational database concepts.
- Supported students during practical session and helped review assignments and database design tasks.

Teaching Assistant, Software Construction Course **2026**

- Evaluated assignments and supported students in understanding object-oriented programming and software engineering concepts.
- Guided students in debugging, code structure improvement, and software development best practices.

AI Engineering Intern **2026**

- Developed a Whatsapp-based rapid response bot to facilitate communication between residents and relevant authorities for emergency incidents such as theft, robbery, and fire.
- Implemented automated incident handling workflows while collaborating with the development team, managing task effectively, and meeting project requirements and timelines.

Computational Thinking Instructor - Technology for Society program **2025**

- Delivered computational thinking lessons to elementary school students through interactive activities covering problem-solving, logical reasoning, pattern recognition, and algorithmic thinking.
- Facilitated classroom activities while strengthening communication, public speaking, teamwork, and time management skills.

Central Computer Improvement - Web Development **2025**

- Developed and maintained backend components for web-based projects, focusing on data processing, API integration, and system logic.
- Collaborated with team members to implement functional features and support project requirements.

Member, Human Resource Development Division, Software Engineering Student Association **2024-2025**

- Contributed to student development programs aimed at improving academic, soft skills, and organizational competence.
- Assisted in organizing training, mentoring, and evaluation activities for members.

English Camp **2019**

- Actively engaged in intensive English communication activities, improving speaking, listening, and academic communication skills.
- Participated in group discussions, presentations, and collaborative task conducted fully in English.

EDUCATION

Senior High School - Science Major (IPA) **2020 - 2023**
SMAN 9 Tangerang Selatan

Bachelor of Software Engineering **2023- Present**
Telkom University

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, Javascript, C#, Typescript, Go, C++, php
- **Web Development:** HTML, CSS, Node.js
- **Tools:** Git, GitHub, VS Code, Visual Studio, Google Colab, Katalon Studio, Postman, Figma
- **Database:** MySQL, MongoDB, PostgreSQL, supabase

ADDITIONAL INFORMATION

- **Skills:** Problem Solving, Teamwork & Collaboration, Time Management, Adaptability, Communication Skills, Organizational Skills.
- **Languages:** English, Indonesia.
- **Certifications:** Leadership Certificate, Self-Management Certificate, Technopreneurship Certificate, Department Orientation Program Certificate, Kaggle - Intro to Deep Learning Certificate, Kaggle - Time Series, Kaggle - Intro to Machine Learning Certificate, Kaggle - Intermediate Machine Learning Certificate.
- **Awards/Activities:** 3rd Place Winner - The Hack Competition (Central Computer Improvement), Staff of the Month - Software Engineering Student Association.
